DIGNO Ventures Pvt. Ltd. (DVPL) started their Lubricant and allied products manufacturing unit in South Kerala, India in the year 2020.

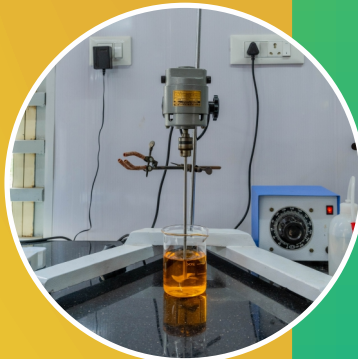

We have a sophisticated laboratory as part of the unit to keep the quality of all our products on par with national and international standards.

The promoters of the company are well experienced engineers and scientists with decades of experience in petroleum industries in India and abroad

We cater to the needs of local, national and international customers. We are ever willing to extend our expertise and support to all our customers.

The unit has state of the art manufacturing plant with latest technology and installed capability for new generation lubricants production.

In addition to quality control, the laboratory is engaged in research work for continuous improvement of products in line with the demands of our esteemed customers. Tribology, the science of lubrication, is highly interdisciplinary involving knowledge in the fields of material science, chemistry, physics, and microbiology besides engineering.
